

All Inclusive Pricing

Comprehensive Ascent Program (CAP) for Rural Health Imaging Providers

Let us show you how our innovative healthcare solutions enable rural providers to bring the best equipment to their community.

CAP provides cost effective imaging solutions with one low monthly payment.

**RURAL
FOCUSED**

CAP delivers Innovative Technology and Unparalleled Support in One Monthly Payment

Community hospitals in rural areas face many challenges and providing a full suite of medical imaging should not be one of them. One monthly payment eliminates unbudgeted surprises and reduces expenses over the lifetime of the equipment.

The result: Lower total cost of ownership and increased revenue.

Your Rural Focused Imaging package includes everything you need*

- Industry's best, 99% Uptime Guarantee
- ActiveLine 24/7 Remote Monitoring
- Remote alerts, Service Diagnostics & updates
- Reduced pricing on options

- Fujifilm CE accredited training modules
- Customized Advanced Marketing Program tailored to your community

*Post sales support features vary by product—contact us for more information.

Adding Fujifilm's high performing equipment to your community helps reduce patient outmigration to large hospital networks in urban areas.

Scenaria View CT

- Extra-wide (80cm) aperture and table spaciously accommodates the most challenging patients.
- Auto Lateral Shift Table enables quicker, easier and more accurate positioning, and is especially helpful when techs are working alone.
- Reduced exam times.

ASPIRE Cristalle 3D mammography

- Patented patient comfort & fast exam acquisition.
- Exceptional image quality, gentle patient dose.
- Automated dose & feature recognition optimizes image detail across all breast types.

Echelon Oval MRI

- Widest bore and table on the market comfortably accommodates patients up to 550 lbs.
- Feet-first imaging also helps put anxious patients at ease.
- Mobile table is battery-powered, lowering to 20 inches and is included with the system.

Oasis Velocity MRI

- Unique open gantry accommodates a spacious feeling especially for claustrophobic, bariatric, geriatric and pediatric patients.
- Extra-wide patient table accommodate patients up to 660 lbs.
- In-gantry left and right movement for easy patient positioning.

Synapse 3D

- Display imaging through one diagnostic viewer that promotes cross-departmental collaboration and standardized workflows, enhancing care coordination, staff productivity and the patient experience.

Top Rated DR solutions

- Space & budget saving, detectors, rooms, mobiles, R&F, c-arms and mammography systems.
- Loaded with features to simplify workflow and maximize patient comfort and safety.
- Innovative technologies for premium image quality and gentle dose.

ARIETTA 750SE Ultrasound

- Improves resolution uniformity and eliminates focal zone dependence with eFocusing.
- Efficiency tools like Protocol Assistant and iVascular automatic operation reduce scan times and user variability.
- Supports single-crystal probe designs that maximize penetration on difficult patients.

Fujifilm — Your Platinum Partner

Fujifilm was selected as a Platinum Partner of the National Rural Health Association based on our expertise and knowledge of the rural health industry.

We demonstrate our commitment by offering the highest level of image quality, pricing and excellent customer service.

Customer-first philosophy compels us to make customer support the most important thing we offer.

Easy financing through our Comprehensive Ascent Program for rural health care leaders
